Quiz :- 03

q.5

```
#include <std
```

```
using namespace std;
```

```
int main ( );
```

```
{
```

```
int num_of_subj = 1; marks; total = 0;
```

```
for (num_of_subj = 1; num_of_subj <= 10; num_of_subj++)
```

```
{
```

```
cout << "Enter marks of subject " << num_of_subj << endl;
```

```
cin >> marks;
```

```
total = marks + total;
```

```
}
```

```
float averag;
```

```
averag =  $\frac{\text{total} \times 20.0}{200.0}$ ;
```

```
cout << "Your average marks are " << averag << endl;
```

```
return 0;
```

```
}
```

write a program that takes
The marks of 10 subjects
as input & display the
average score.
